Problem Statement

Although buying and holding is considered the best strategy in investing. We would have to prove or disprove that hypothesis based on the dataset given to us about the price of S&P 500 and bond yield rate.

Our Solution

We will disprove this hypothesis by coming up with our own investment strategy that minimizes risk while maximizing returns. By employing a mixed-methods approach that combines statistical analysis with machine learning techniques, we aim to identify potential patterns and trends within the financial data that can inform our investment strategy. Specifically, we will analyze historical price movements of the S&P 500 alongside various economic indicators, including bond yield rates, to uncover correlations that may suggest more optimal entry and exit.

Bullet Points

- Lorem ipsum dolor sit amet, consectetur adipiscing elit
- Aliquam blandit faucibus nisi, sit amet dapibus enim tempus eu
- Nulla commodo, erat quis gravida posuere, elit lacus lobortis est, quis porttitor odio mauris at libero
- Nam cursus est eget velit posuere pellentesque
- Vestibulum faucibus velit a augue condimentum quis convallis nulla gravida

Blocks of Highlighted Text

In this slide, some important text will be highlighted because it's important. Please, don't abuse it.

Block

Sample text

Alertblock

Sample text in red box

Examples

Sample text in green box. The title of the block is "Examples".

Heading

1. Statement
2. Explanation
3. Example

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Integer lectus nisl, ultricies in feugiat rutrum, porttitor sit amet augue. Aliquam ut tortor mauris. Sed volutpat ante purus, quis accumsan dolor.

Treatments	Response 1	Response 2
Treatment 1	0.0003262	0.562
Treatment 2	0.0015681	0.910
Treatment 3	0.0009271	0.296
